#### A TRAGIC ENCOUNTER

At a Political Meeting Council by on in-guit to a Young Lady.

PETERSBURG, Ind., Aug. 8.—The vil-lage of Winelow, which is hine miles south of this place, was the scene of one of the most bloody tragedies Satur-

day that this county ever knew. convention of the county and a large crowd had assembled and all seemed to be enjoying perfect harmony, when Miss Redd, the daughter of a respected farmer, was indecently assaulted by one Barnes, a coal miner of Apershire, which is a coaling station near Win-

Sheriff Stillwell arrested Barnes in McCoy's saloon, when he was at ooce set upon by a dozen drunken inhers, who demanded the release of Barnes, which was refused. The shertif called upon bystanders to assist him, when a general fight ensued with knives, razors, billiard cues, etc., as weapons When the battle was over Bartley Stinson, one of the miners, was cut literally to pieces. He had one gash on the breast near the heart about eight inches long and spread apart widely; another gash longer and uglier on the chest and abdomen, and still another on the back, extending beneath the arm and down the side at a great length, and his brother, Pete Stinson, had his throat cut. The gush being about six inches long and very deep, with a deep wound on his breast and one arm about half severed. Both men are fatally wounded. It is said Jim McKinney did the cutting on these two miners, and that he is yet at large. Levi Redd, a brother the young lady assaulted, who was assisting the sheriff, was stabbed in three places and is badly hurt. Several others were more or less hurt in the melee, but their names are unknown. The sheriff was in the thickest of the fight, but came out with a few painful bruises. No arrests as yet have been made. The affair is greatly regretted, as the Stinson brothers are quiet, hard-working miners when not drinking, and McKinney is highly con-nected in this county. Whisky was the nected in this county. prime cause of it all.

#### A SCHEME

To Establish Communication Between Earth and Mars.

LONDON, Aug. 8 -Mr. Francis Galton. F. R. S., F. G. S., chairman of the committee in charge of the Kew observatory, has written a letter to the Times relative to a scheme for establishing communication between Mars and the earth. Mr. Galton declares that a beam of sunlight reflected through a hole one-tenth of an inch square in a plate in front of a mirror would be just as distinctly seen as a faint glint at a distance of ten miles. The amount of fog and haze which a beam of light would traverse between the earth and Mars, when the latter is high above the horizon, Mr. Gal-ton says, could not exceed that along an earthy ten-mile. Therefore the same proportion between the size of the mirror and the distance holding true, it follows that the firsh from many mirrors simultaneously, whose aggregate width was fifteen yards, and and whose aggregate length, to allow for slope was, say, twenty-five yards, would be visible on Mars if seen through a telescope like that at the Lick observ California, and the inhabitants, if they have eyes and fairly good telescopes, would speculate concerning the beam, and would wish to answer.

Louisville, Ky., Aug. 8.—In the mid-dle of the Ohio river, near Paddy's Bun, eix miles below the city, a terrible battle was fought Sunday afternoon by seven toughs, who were in two skiffs. Ed Biel and Will and John Biel, his cousins, were in one boat, and Jim Soregel, of New Albany, and three friends in the other. The members of the two boating parties had quarreled at a fish-fiy, and when they met in mid-stream they rowed for each other and the two boats meeting the occupants began to beat each other over their heads with oars. Ed Biel was knocked overboard and drowned and the others were severely injured. Soregel had a pistol, but it would not go off. He has been arrested.

Why Cholera Corpses Appear to Be Alive VIETNA, Aug. 8 -Dr. Frey, an expert in matters pertaining to cholera, writes to the newspapers that in the experience of himself and other doctors. the notion prevailing among ignorant persons that cholers patients were often buried alive may be attributed to the fact that three hours after death the bodies of victims of the scourge become distorted by muscular con-tractions, often lasting for hours. These contractions are taken by the persons mentioned as indicating that life still exists in the bodies, and as the remains of cholera patients are interreas soon after death as possible, thes people imagine that the patients are buried before life is really extinct
